SECTION I
INTRODUCTION

1. Scope

This manual lists repair parts; special tools; test, measurement, and diagnostic equipment (TMDE); and other support equipment required for operation and performance of direct support and general support maintenance of the 10-ton, 6x6 truck.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. Section II, Repair Parts List. A list of repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts lists are composed of functional groups in ascending numerical sequence, with the parts in each group listed in figure and item number sequence.

b. Section III, Special Tools List. A list of special tools, TMDE, and support equipment authorized for the performance of maintenance at the direct support and general support levels.

c. Section IV, National Stock Number and Part Number Index. A list, in ascending numerical sequence, of all National stock numbers appearing in the listings, followed by a list, in alphameric sequence, of all part numbers appearing in the listings. National stock number and part numbers are cross-referenced to each illustration figure and item number appearance. This index is followed by a cross-reference list of reference designations to figure and item numbers when applicable.

3. Explanation of Columns

The following provides an explanation of columns found in the tabular listings:

a. Illustration. This column is divided as follows:

(1) *Figure number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item number.* The number used to identify each item called out in the illustration.

b. Source, Maintenance, and Recoverability Codes (SMR).

(1) *Source code.* Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

Code	*Definition*
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purpose because essentiality dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
PD	Support item, excluding support equipment, procured for initial issue or outfitting and stocked only for subsequent or additional initial issues or outfittings. Not subject to automatic replenishment.
PE	Support equipment procured and stocked for initial issue or outfitting to specified maintenance repair activities.
PF	Support equipment which will not be stocked but which will be centrally procured on demand.
PG	Item procured and stocked to provide for sustained support for the life of the equipment. It is applied to an item peculiar to the equipment which, because of probably discontinuance or shutdown of production facilities, would prove uneconomical to reproduce at a later time.
KD	An item of a depot overhaul/repair kit and not purchased separately. Depot kit defined as a kit that provides items required at the time of overhaul or repair.
KF	An item of a maintenance kit and not purchased separately. Maintenance kit defined as a kit that provides an item that can be replaced at organizational or intermediate levels of maintenance.
KB	Item included in both a depot overhaul/repair kit and a maintenance kit.
MO	Item to be manufactured or fabricated at organizational level.
MF	Item to be manufactured or fabricated at the direct support maintenance level.
MH	Item to be manufactured or fabricated at the general support maintenance level.
MD	Item to be manufactured or fabricated at the depot maintenance level.
AO	Item to be assembled at organizational level.
AF	Item to be assembled at direct support maintenance level.
AH	Item to be assembled at general support maintenance level.
AD	Item to be assembled at depot maintenance level.
XA	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB	Item is not procured or stocked. If not available through salvage, requisition.
XD	A support item that is not stocked. When required, item will be procured through normal supply channels.

NOTE

Cannibalization or salvage may be used as a source or supply for any items source coded above except those coded XA, XD, and aircraft support items as restricted by Ar 700-42.

(2) *Maintenance code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

Code	*Application/Explanation*
C	Crew or operator maintenance performed within organizational maintenance.
O	Support item is removed, replaced, used at the organizational level.

I	Support item is removed, replaced, used by the direct support element of integrated direct support maintenance.
F	Support item is removed, replaced, used at the direct support level.
H	Support item is removed, replaced, used at the general support level.
D	Support items that are removed, replaced, used at depot, mobile depot, specialized repair activity only.

NOTE

Codes "I" and "F" will be considered the same by direct support units.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

Recoverability codes	Definition
H	Reparable item. When uneconomically reparable, condemn and and dispose at the general suport level.
D	Reparable item. When beyond lower level repair capability, return to depot. Condemnation and disposal not authorized below depot level.
L	Reparable item. Repair, condemnation, and disposal not authorized below depot/specialized repair activity level.
A	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/ directives for specific instructions.

c. National Stock Number. Indicates the National stock number assigned to the item and will be used for requisitioning purposes.

d. Part Number. Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements, to identify an item or range of items.

NOTE

When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.

e. Federal Supply Code for Manufacturer (FSCM). The FSCM is a 5 - digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or Government agency, etc.

Code	Application/Explanation
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.
F	The lowest maintenance level capable of complete repair of the support item is the direct support level.
H	The lowest maintenance level capable of complete repair of the support item is the general support level.
D	The lowest maintenance level capable of complete repair of the support item is the depot level, performed by depot, mobile depot or specialized repair activity.
L	Repair restricted to designated specialized repair activity.
Z	Nonreparable. No repair is authorized.
B	No repair is authorized. The item may be reconditioned by adjusting, lubricating, etc., at the user level. No parts or special tools are procured for the maintenance of this item.

(3) *Recoverability code.* Recoverability codes
assigned to support items to indicate the disposi
action on unserviceable items. The recoverability co
entered in the fifth position of the Uniform SMR C
format as follows:

Codes	Definition
Z	Nonreparable item. When unserviceable, condemn and dis at the level indicated in position 3.
O	Reparable item. When uneconomically reparable, condemn dispose at organizational level.
F	Reparable item. When uneconomically reparable, condemn dispose at the direct support level.

f. Description. Indicates the Federal item name a
if required, a minimum description to identify the it
Items that are included in kits and sets are listed be
the name of the kit or set with the quantity of each iter
the kit or set indicated in the quantity incorporatec
unit column. When the part to be used differs betw
serial numbers of the same model, the effective se
numbers are shown as the last line of the description
the Special Tools List, the initial basis of issue (BOI)
pears as the last line in the entry for each special to
TMDE, and support equipment. When density of equ
ments supported exceeds density spread indicated in
basis of issue, the total authorization is increased
cordingly.

g. Unit of Measure (U/M). Indicates the standard
the basic quantity of the listed item as used in perform
the actual maintenance function. This measure is expr
sed by a two - character alphabetical abgreviation (e.
ea, in, pr, etc.). When the unit of measure differs fr
the unit of issue, the lowest unit of issue that will sati
the required units of measure will be requisitioned.

h. Quantity Incorporated in Unit. Indicates t
quantity of the item used in the breakout shown on t
illustration figure, which is prepared for a function
group, subfunctional group, or an assembly. A "
appearing in this column in lieu of a quantity indicat
that no specific quantity is applicable (e.g., shim
spacers, etc.).

4. Special Information

a. Usable on codes are shown in the descriptio
column. Uncoded items are applicable to all mode
Identification of the usable on codes used in this pub
cation are:

Code	Used On
833	Model M123
834	Model M123C
046	Model M123A1C
B72	Model M123E2
302	Model M125

b. Detailed manufacturing instructions for item
source coded to be manufactured or fabricated are foun
in TM 9-2320-206-34. Bulk materials required to manu
facture items are listed in the Bulk Material Group of th
manual.

c. Repair parts kits and gaskets sets appear as the las entries in the repair parts listing for the figure in which its parts are listed as repair parts.

d. The following publications pertain to the M123 series 10-ton truck and its components:

Publication and Short Title

LO 9-2320-206-12, Truck, Tractor, 10-Ton, 6x6
TM 9-2320-206-ESC, Truck, Tractor, 10-Ton, 6x6
TM 9-2320-206-10, Truck, Tractor, 10-Ton, 6x6
TM 9-2320-206-20, Truck, Tractor, 10-Ton, 6x6
TM 9-2320-206-20P, Truck, Tractor 10-Ton, 6x6
TM 9-2320-206-34, Truck, Tractor 10-Ton, 6x6
TM 9-2815-213-34, Engine, Diesel, Cummins Model V8-300
TM 9-2805-208-34P, Gasoline Engine, LeRoi Model T-H844

5. How to Locate Repair Parts

a. When National Stock Number or Part Number is Unknown:

(1) *First.* Using the table of contents, determine the functional subgroup within which the repair part belongs. This is necessary since illustrations are prepared for functional subgroups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the functional subgroup to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When National Stock Number or Part Number is Known.

(1) *First.* Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. This index is in ascendig NSN sequence followed by a list of part numbers in ascending alphameric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* After finding the figure and item number in the repair parts list.

6. Recommendation for Maintenance Publications Improvements

You can improve this manual by recommending improvements using DA Form 2028 (Recommended Changes to Publications and Blank Forms) and mail the form direct to Commander, US Army Tank-Automotive Command, ATTN: DRSTA -MTP, Warren, MI 48090. A reply will be furnished direct to you.

THIS PAGE IS INTENTIONALLY LEFT BLANK.

						NOTE THE COMMANDING GENERAL, US CONARC/CINCAR STRIKE, WILL AUTHORIZE THE ISSUE OF TIRE CHAINS TO UNITS ON CONTINGENCY PLANS AS REQUIRED. FOR UNITS NOT ON CONTINGENCY PLANS, TIRE CHAINS WILL BE ISSUED ONLY AS REQUIRED TO MEET LOCAL CONDITIONS (NOT AS ITEMS OF OVE OR INITIAL ISSUE). REQUISITIONS FOR TIRE CHAINS WILL BE SUBMITTED WITH JUSTIFICATION FOR SAME. IN CONTINENTAL UNITED STATES, THE COMMANDING GENERAL OF THE ARMY CONCERNED WILL APPROVE REQUISITIONS FOR TIRE CHAINS. FOR NATIONAL GUARD UNITS, THE UNITED STATES PROPERTY AND DISBURSING OFFICER OF EACH STATE WILL APPROVE REQUISITIONS. COMMANDING GENERALS OF OVERSEA COMMANDS WILL AUTHORIZE ISSUE OF TIRE CHAINS WHEN DEEMED NECESSARY. TIRE CHAINS AND CROSS CHAINS (REPAIR PARTS) ARE FOR GENERAL APPLICATION ACCORDING TO TIRE SIZE.
